WindEnergy 2018: Energiequelle draws the winner of one year free electricity

Konstantin Schurin wins the first prize at the “hot wire” of the big Energiequelle Cup.

Hamburg/Kallinchen, October 2018. As part of this year's WindEnergy trade fair in Hamburg, the Energiequelle GmbH invited the visitors to participate in the big Energiequelle Cup. Two times per day they had the chance to compete at the hot wire for winning the first prize: one year free electricity delivered by Energiequelle's daughter company eqSTROM, only from renewable sources of course.

Lucky winner

This week the winner was drawn by Gregor Weber, authorized representative and division manager at the international project developer. Mr. Schurin is very happy about receiving one year electricity for free (max. 3000 KkWh). “Not only the game has been a lot of fun, but especially the fantastic first prize has motivated to participate. I am very happy and would like to say thank you”, says Technical Sales Manager of WKA Blade Service GmbH.

Positive fair feedback

Also Joachim Uecker, one of the CEOs of the company, is very pleased with the active participation at the hot wire. But not only the Energiequelle Cup and the fresh pressed orange juice attracted the visitors. A small event organized on Wednesday afternoon got a lot of attention of the visitors. Culinary delicacies from the Energiequelle locations Germany, France and Finland were served and a lot of interesting conversations took place. “We are very happy that so many of our business partners accepted our invitation. The personal contact is very important to us”, says Uecker. The Energiequelle fair stand for 2020 is already booked.
