Energiequelle GmbH receives award for its excellent credit rating

The CrefoZert credit rating certificate and the eligibility for central bank credit from the Deutsche Bank demonstrate the financial strength of the international company

Kallinchen, 23 August 2023. Energiequelle GmbH has, as in the last few years, been awarded the CrefoZert credit rating certificate. The company was given an "excellent credit rating" in the second-highest of nine main rating classes. The certificate is issued by Creditreform, a leading German expert in assessing the credit standing of companies. The award is based on a three-stage certification process in which the credit rating index, an analysis of the annual financial statements and a written survey are included. As part of the audit, Energiequelle demonstrated an excellent credit standing structure and met all certification criteria. Only around 1.7% of all German companies achieve this. The certificate is valid until June 2024.

The Deutsche Bundesbank also certifies that Energiequelle GmbH has a very good investment grade credit rating. The company received the certificate of eligibility this week.

"We are delighted with the high credit ratings. It confirms the successful work of recent years, our economic stability and the good company forecasts," says Jörg Karaschewski, Senior Manager Corporate & Structured Finance at Energiequelle.
