October 2023

Energiequelle GmbH opens new office in Stuttgart

Stefan Groos is the new Head of Project Management in Southern Germany

Kallinchen, 26 October 2023. Energiequelle GmbH opened a new office in Stuttgart in October. This will further drive forward business activities in southern Germany in the wind, solar and hybrid power plants sectors and strengthen the good market position in Germany. The company's primary aim is to establish itself as a regional and value-oriented partner and to support municipal utilities, municipalities, local project developers and landowners in the expansion of renewable energies.

Stefan Groos is the new Division Manager in the South region

Stefan Groos is responsible for the expansion of business activities in Baden-Württemberg and the other southern German states. He joined Energiequelle GmbH in August and in October opened the new location in Stuttgart, which is conveniently located right by the airport. Five colleagues are already working at the new location, and various other employees are being sought. A new office is to be established in Bavaria by next year at the latest.

Stefan Groos previously held leading positions in Germany and North America during his almost 25 years in the renewable energy sector. As a board member of a regional company in Baden-Württemberg, he was responsible for the development and implementation of over 120 MW of successful wind projects until 2019 and is now looking forward to his exciting new role at Energiequelle: "In the first few weeks, I got to know Energiequelle as an excellently structured company with clear responsibilities and as a caring and ambitious employer. Together with my colleagues, we will implement the many existing projects that Stefan Siegmund and his team have already acquired in his role as head of department in Thuringia, Hesse, Rhineland-Palatinate and Saarland, as well as in Baden-Württemberg and Bavaria."
