

PRESS RELEASE

December 2023

Energiequelle GmbH is once again among the TOP 1 per cent of the best employers in Germany

Energiequelle is awarded as a Leading Employer for the third time in a row

Kallinchen, 21 December 2023. Energiequelle GmbH receives the Leading Employer quality seal again in 2024. This puts the international company in the top 1 per cent of over 200,000 employers surveyed in Germany. The underlying data is compiled and analysed from over 250 international sources. A wide range of criteria are taken into account, such as employee satisfaction, working conditions, values, job security and the company's environmental awareness.

Energiequelle - more than just an employer

In addition to an open corporate culture with flat hierarchies, Energiequelle offers many additional benefits that support and encourage employees both professionally and personally. Dirk Meiser, Head of Central Functions, is positive about the current growth trend at Energiequelle: "We currently employ more than 500 people in Germany and at our international locations, and the number is rising. Despite our strong growth, we do not lose sight of the fact that employee appreciation is the basis of our corporate culture. This is demonstrated by the 100 per cent recommendation rate on Kununu and the low staff turnover rate of currently 4.2 %. We are delighted to have once again been awarded as a Leading Employer and see this as confirmation of our orientation as a value-oriented and family-friendly employer."

To date, Energiequelle has connected more than 850 plants with a total output of almost 1,600 MW to the grid across Europe and is one of the leading companies in the renewable energy sector with a total of 24 branches in Germany, France, Finland and Poland.
