February 2024

P&T Technologie becomes Energiequelle SAS

French subsidiary of Energiequelle GmbH changes its name

Saint-Jacques-de-la-Lande, 8 February 2024. P&T Technologie has changed its name. The French subsidiary of Energiequelle GmbH has been called Energiequelle SAS since February 1 and has thus adopted the name of the parent company.

P&T has been active in the French market since 2002 and is a key player in the renewable energy sector. The company has been part of the Energiequelle Group since 2010 and currently employs more than 50 people. In addition to the main site in Rennes, Energiequelle has branches in Dijon and Bordeaux in France. In order to meet the company's continued growth and further staffing requirements, it has moved into larger offices in Rennes in recent weeks, with the same to follow in Dijon in March.

Jan Ducouret, Managing Director of Energiequelle SAS, is delighted with the developments: "Both the new name and the new premises are important steps in the continued growth of our company. The expertise of our employees and the strength of our parent company will enable us to master the new challenges in France."

Michael Raschemann, owner and Managing Director of the Energiequelle Group, is also pleased about the change: "It fills me with joy and pride that our French subsidiary has decided to change its name after so many years of trusting cooperation. The name change demonstrates our sense of togetherness and allows the Energiequelle family to continue to grow."

France was Energiequelle's first market in other European countries. Today, the company is also active in Finland and Poland. In France alone, more than 280 MW have been connected to the grid, and two further wind farms are currently in the realization phase.
